# Closing a Critical Security Gap

APPLICATION SECURITY

by tamper-proofing code and cryptographic keys against modifications

AT RUNTIME

Embedded Systems		
Industrial Manufacturing	Finance	Medical Devices
Critical Infrastructure	Mobile	Smart Home
Semiconductor	Automotive	Military/Air Force

Reverse engineering & IP protection, Digital rights, License checking

- ✓ Best in class protection easy to implement.
- ✓ Tamper-proofing and pre-linking native object files.
- ✓ Seamless integration of protection and application.
- ✓ Protection of libraries, large optimized programs and sub programs.
- ✓ Precise location technology for adjustment of security versus performance impact.
- ✓ Customization to your needs.
- ✓ Extension to accommodate any customer.
